

IN THE CLAIMS

Please amend claims 14, 16 and 26 as follows:

14. (Twice Amended) An image forming device in accordance with claim 13, further comprising a finisher for stapling sheets printed by said printer, wherein:

5 said state decision controller determines whether said image data stored in said memory includes image data having a frame size different than a frame size of other image data stored in said memory; and

10 said selection prohibiting controller prohibits selecting a staple print mode through said operation panel when it is determined that said memory includes image data having a frame size different than a frame size of other image data stored in said memory;

said staple print mode being provided so that said finisher provides a staple processing.

16. (Twice Amended) An image forming device in accordance with claim 13, wherein:

5 said state decision controller determines whether said image data stored in said memory all have a same frame size; and

10 said selection prohibiting controller prohibits selecting an economy print mode through said operation panel when it is determined that said image data stored in said memory do not all have a same frame size, said economy print mode being provided for printing said image data of a plurality of frames on one same side of a sheet.
